V1.0	21/04/2023	Creación del documento, Tabla de tareas

Introducción

En este documento introducimos una tabla para las tareas del proyecto. Cada fila incluye el título de la tarea, una descripción para la misma, el rol o el personal asignado, el tiempo planificado para la tarea y el tiempo final empleado. Seguido a la tabla se calcula el presupuesto para llevar a cabo su implementación a priori para, una vez terminado el entregable, poder ver y comparar la estimación de lo real.

G-026 – Ops. Auths. sobre Notes	“Operations by authenticated principals on notes: <ul style="list-style-type: none"> List the notes that are not older than one month and show their details. Post a note. This operation requires confirmation because notes cannot be updated or deleted.” 	Antonio / Analista y Desarrollador	5h	-
G-027 – Ops. Any sobre Banners	“Operations by any principals on banners: <ul style="list-style-type: none"> Display any of them randomly, as long as its display period are active; the banners must be shown in every page as little intrusively as possible.” 	Ismael / Analista y Desarrollador	4h	2 h
G-028 – Ops. Admin. sobre Banners	“Operations by administrators on banners: <ul style="list-style-type: none"> List the banners and show their details. Create, update, or delete a banner.” 	Ismael / Analista y Desarrollador	4h	2h 30'

G-029 - Internacionalizar Moments, Money amounts y Booleans	"Moments, money amounts, and Booleans must be internationalised when they are shown. Other kinds of data are not expected to be internationalised. This requirement must be fulfilled in this and every subsequent group or individual deliverable."	Antonio / Analista y Desarrollador	0'	0'
G-030 - Mostrar las Money amounts adecuadamente	"The system must show money amounts as they are entered by the users, but also their corresponding money exchanges according to the system currency if their known exchange ratios are recent. It is the students' responsibility to find the appropriate exchange-rate service; no implicit or explicit liabilities shall be covered by the University of Seville or their individual affiliates if the students hire pay-per-use services! This requirement must be fulfilled in this and every subsequent group or individual deliverable for it to be considered fulfilled."	Antonio / Analista y Desarrollador	20'	-
G-031 - Detector de Spam	"The system must prevent the principals from storing any data that can be considered spam. A piece of text is considered spam if the number of spam terms exceeds a predefined spam threshold. The default list of spam terms includes the following ones: "sex", "viagra", "cialis", "one million", "you've won", "nigeria", and their corresponding translations into the languages considered for internationalisation; the default spam threshold is 10%. Note that the previous default values can be changed at will by the administrators. Realise that a term must be considered spam irrespective of its case and the blanks in between its words; for instance, "one_million" is a spam term that matches "one_million", "ONE_MILLION", "OnE_MiLLiOn", or "One_ Million"; it doesn't match "One_Millionaire", "One_or_two_millions", or "One_sex_million", though. The spam detector must be re-usable across different projects; that is: it must be implemented as an independent project that must be packaged into a reusable dependency. Do not forget to deliver your spam detector project so that it can also be evaluated or, otherwise, this requirement shall not be considered fulfilled. This requirement must be fulfilled in this and every subsequent group or individual deliverable."	Pedro y Jesús / Analista y Desarrollador	3h	-

(*) Para calcular la amortización inicial se consultaron los artículos referenciados en la bibliografía.

Conclusiones

Como se han dejado ciertas tareas abiertas en este entregable, el presupuesto final se reduce drásticamente, lo que no es adecuado para una empresa real.
